 SUBJECT Railroad Car Construction in the DDR

DATE DISTR 18 August 1952

NO. OF PAGES 1

PLACE ACQUIRED

25X1C

NO. OF ENCLS.
 (LISTED BELOW)

DATE OF INFO.

25X1X SUPPLEMENT TO REPORT NO.

The VEB Railroad Car Plant in Miesky (O 52/A 92) was scheduled to complete the first train with doubledeck railroad cars by late January 1952. (1) The total length of the train will be 74 meters. Each car has two entrances over the three-axle trucks. The cars will resemble the railroad cars of the Lubbeck (L 54/S 23) - Rueden (L 54/S 94) line. The new train will carry 500 passengers and will be assigned to commuter service in the Halle area.

25X1A (1) Comment. The Miesky plant is the former Christoph & Ummack Corporation. It is now an enterprise of the VEB Loma in Wildau.
